Bangor STD Clinic Now offers 20 Minute HIV Test

The Bangor STD Clinic is now offering the 20-minute HIV tests. This test allows individuals to receive their test results in 20 minutes and feel confident that the test results are 99% accurate. The test is done by an oral swab of the mouth, so there is no need to take blood. The price of this OraQuick test is \$50.

With the rates of HIV increasing in the country, there is a need to have individuals come in for testing and an even a bigger need for them to return for their results. With this new test, you can get your test results shortly after the test and with no need to return at a later date.

The Bangor STD Clinic will continue to offer anonymous HIV testing and testing for other sexually transmitted disease as well.

If you have any questions about this test or to set up an appointment, please give us a call at 947-0700.
